

Design R&D Euromobil and Roberto Gobbo

Project

Lightness, transparency and sustainability are the key words inspiring Levitas. "Levitas" brings to mind lightness and movement, inspired by the fluidity of air. The Levitas door reflects this concept through its airy and slender design, characterized by clean lines and transparent materials that make any interior feel spacious.

The system allows the creation of base units, wall units, tall units, column units, display units, and sideboards. The aluminum frame is available in Champagne and Bronzo satinato finishes, combined with the new Antis metallized lacquers and matt Nero assoluto. The highly customizable system includes panel or aluminum sides and panel or glass back panels.
